

Assignment
<b>Peer Assessment Form</b>

<b>Self Review</b>	
Student Name: Luke Edwards	Role: developer(Backend Systems)
Student Number: s5341152	Grade <i>[Out of 10]</i> : 8
Comments: I worked with satyam with making activity diagram and I also made the state diagram and explained it. Although I liked how my state diagram turned out it took me a few days to create and explain the diagram which delayed the groups progress a bit. I also showed up to each meeting and actively contributed in them to help us come up with ideas for our project and how we wanted the end project to look. I do feel however that I didn't communicate with the group online as well as the others did which hindered the groups progress.	

<b>Peer Review</b>	
Student Name: Chanutda Manosorn	Role: Project manager
Student Number: s5313405	Grade <i>[Out of 10]</i> : 10
Comments: Chan was very organised when working in the group. Before our first meeting she already organised what everyone in the group was doing and had a good idea as to what was need for the assignment. The Gantt chart and kenban were set up really well as they showed exactly what needed to be done and set up due dates for each of the tasks, so we knew when our work was due. She helped everyone with her work to the best of her ability and let us know if we needed to add anything to our explanations.	

<b>Peer Review</b>	
Student Name: Reem Aljorani	Role: Requirements analyst
Student Number: s5340174	Grade <i>[Out of 10]</i> : 9
Comments: Reem worked very effectively throughout this first sprint. She mainly worked on the requirements specification and the use case diagram. Everything she worked on was very detailed and the work she completed was done on time. Reem had a clear understanding as to what she was supposed to do, and she regularly communicated where she was up to in her work. She was a very supportive teammate and help give me and Satyam ideas for the activity diagram and replied only very quickly if someone had a question. She did miss the first meeting but communicated that she couldn't make it with us before but overall, she was at the meetings on time and was constantly getting involved in the work we were doing.	

<b>Peer Review</b>
--------------------

Student Name: Satyam Sharma	Role: Developer (Front End UI/UX)
Student Number: s5330583	Grade <i>[Out of 10]</i> : 9
Comments: Satyam was also working very effectively throughout this sprint. When I worked with him on developing the activity diagram, he had good ideas which we could add to the diagram and was able to describe the diagram on the word document very well. He asked others to help if he needed it and asked people for feedback after he was done. Satyam setup the in-person meetings and made sure that we all knew when those meetings were. I also saw him helping the other teammates and gave good Insights when we were talking about the requirements.
